

EUROPEAN DISTRIBUTOR ANNOUNCEMENT

June 2023

NorthWest Clean Air Company Inc (NWCA) is very pleased to announce the appointment of DECC Benelux as the exclusive Distributor for the NWCA SERIES 2 Turbocharger Filters for European offshore vessel applications.

DECC Benelux, with over 15 years of experience in the marine and power market, is based in Gravendeel, Netherlands and provides sustainable preventative fouling products and cleaning services to ship owners, shipyards and ship repair companies with a focus on OSV, dredging, tugs, tankers and general cargo vessels.

It is because the turbocharger boosts power and efficiency of the marine diesel engine that it is vital to stay on top of maintenance to ensure low fuel consumption along with maximum reliability. The silencer air filter is a critical component of the overall system and the fundamental reason that NWCA developed the unique 10 year warranted SERIES 2 turbocharger silencer filter.
